 **LACTONA**
Dental Care Clinic

Product brochure

Interdental **Cleaners** and EasyDent without holder

The brushhead has a solid implant of soft, but firm, polished nylon filaments. The plastic coating of the wire protects against galvanic shock to sensitive teeth and gums. Ideal for cleaning spaces between the teeth, spaces between crowns and bridgework, fixed orthodontic appliances and implants.

Interdental **Cleaners** (cylindrical)

The Interdental Cleaners are very effective at removing interdental plaque, due to the extra long brushhead and greater density of nylon filaments per cleaner.

Size	Type	Colour of the wire	Twisted wire Ø	Single wire Ø
2,0 mm	XXX-Small	silver	0,51 mm	0,28 mm
2,5 mm	XX-Small short	yellow	0,54 mm	0,30 mm
2,5 mm	XX-Small long	yellow	0,54 mm	0,30 mm
3,1 mm	X-Small	red	0,63 mm	0,35 mm
4,0 mm	Small	green	0,63 mm	0,35 mm
5,0 mm	Medium	blue	0,72 mm	0,40 mm
6,5 mm	Large/Medium	black	0,81 mm	0,45 mm
8,0 mm	Large	violet	0,99 mm	0,55 mm
10,0 mm	X-Large	transparent	0,99 mm	0,55 mm
12,0 mm	XX-Large	dark red	0,99 mm	0,55 mm

EasyDent (conical)

The EasyDent combines different sizes in one interdental cleaner and is especially suitable for users of different sizes of cleaners.

Size	Type	Colour of the wire	Twisted wire Ø	Single wire Ø
2,5-5,0 mm	Type A	yellow	0,63 mm	0,35 mm
3,1-8,0 mm	Type B	red	0,72 mm	0,40 mm
6,0-11,0 mm	Type C	black	0,81 mm	0,45 mm

EasyGrip

Interdental Cleaners with a fixed holder

EasyGrip

A solid implant of soft, but firm, polished nylon filaments. The plastic coating of the wire protects against galvanic shock to sensitive teeth and gums. Ideal for cleaning spaces between the teeth, implants, under bridgework and after periodontal surgery.

The ergonomic hexagonal firm grip, designed in cooperation with the dental profession, is easy in use. The cleaner can hygienically be put away in the accompanying cap. The cap can also be used to lengthen the cleaner.

EasyGrip Ultra Small

With the development of a very small Interdental Cleaner (the new EasyGrip Ultra Small), Lactona has expanded its range of Interdental Cleaners.

This Interdental Cleaner with firm holder has a size of 1,9 mm. and a wire thickness of 0,36 mm. (twisted). It is the smallest cylindrical EasyGrip in the range of Lactona Interdental Cleaners. Ideal for cleaning of very small Interdental spaces.

Size	Cylindrical types	Colour of the holder	Twisted wire Ø	Single wire Ø
1,9 mm	Ultra Small	orange/white	0,36 mm	0,20 mm
2,0 mm	XXX-Small	grey/white	0,54 mm	0,30 mm
2,5 mm	XX-Small	yellow/white	0,54 mm	0,30 mm
3,0 mm	X-Small	red/white	0,54 mm	0,30 mm
4,0 mm	Small	green/white	0,63 mm	0,35 mm
5,0 mm	Medium	lightblue/white	0,63 mm	0,35 mm
	Conical types			
2,5-5,0 mm	EasyDent A	white/white	0,54 mm	0,30 mm
3,0-7,0 mm	EasyDent B	darkblue/white	0,63 mm	0,35 mm

Other Interdental Products

Blue Floss and Blue FlossTape

Utilizing the Blue Floss (50 mtr) and Blue FlossTape (40 mtr) the white plaque can easily be noticed.

Both products are lightly waxed, impregnated with fluoride and have a fresh mint flavour.

Intersticks

Made of thin, soft, triangled, polished, birchwood with mint flavour.

To be used double sided and packed in a dispenser containing 100 pcs.

Proxabrush (Periodontal brush)

Long handle with a screwthreaded ring for fitting the short spiral brush into the holder. The spiral brushes are available in two shapes: tapered (type A) and straight (type B). Refillbrushes are available.

Application:

For cleaning interdental spaces, implants, spaces between crowns and bridge-work and orthodontic appliances

Proxabrush

Double single-tufted brush (27BB)

Long handle with a replaceable single-tufted brush at each end of soft, nylon filaments. Both ends are positioned at different angles for better access.

Application:

For cleaning difficult to reach areas, irregular or over crowded teeth and around orthodontic appliances and implants.

Double single-tufted brush

Toothbrushes

Lactona is manufacturer of premium quality toothbrushes. The high quality nylon filaments (Dupont Tynex) for improved bend recovery/memory are either flat trimmed or multitufted, end-rounded and polished. Textures:

- **Extra-soft**, after periodontal surgery.
- **Soft**, for most users.
- **Medium**, for people who prefer a firmer texture to massage the gums.
- **Hard**, good for removing plaque from partial dentures, better for cleaning of removable orthodontic appliances.

Lactona toothbrushes have straight handles with a round brushhead for better grip and control to access hard to reach areas of the mouth. It is possible to put your own text and/or logo on the toothbrushes. Please contact Lactona or your dealer.

iQ+

For:

Adults and children from the age of \pm 10 years.

Filaments:

Combination of white and coloured filaments, extra-soft, soft and medium, 4 row. Densely concentrated pattern for optimal cleaning.

Brushhead:

Contents:

500 ml.

Demonstration **Models** and Instruction **Models**

Model with one or two removable gingivae

To be used for hygienic information and demonstration purposes and oral hygiene instruction.

Model with one removable gingivae

This model clearly shows problems in the mouth caused by gingivitis and periodontitis. Upon removal of the gingivae, severe bone resorption is visible in the posterior region and mild bone resorption in the anterior region (4.1 and 4.3), as well as a loose molar (4.6) with furcation problem.

Model with two removable gingivae

The same as the model with one removable gingivae but this model also includes an extra removable pink gingivae, which shows normal healthy bone and tissue on the other side. This gingivae also demonstrates a McCall festoon (4.6) and a recession/cleft (4.3 and 4.1).

Teeth Model for brushing instructions and demonstration brush

Large educational teeth model combined with a large M39 toothbrush (± 30 cm) to demonstrate brushing technique.

Transparent Teeth Model

Designed for hygienic information, demonstration and instruction. Upper and lower jaw feature periodontal diseases, different stages of caries, several examples of inflammatory root processes, and implant work in a complete upper and lower teeth set in an articulator. Scale 1:1.

AftenCarePlus

An advanced remedy in gel form for the treatment against (aphthous) ulcers and other wounds in the mouth, caused by protruding locks in braces, badly fitting dentures, burned and/or infected oral mucosa.

Lactona AftenCarePlus is a unique formula with medical CE marking Class 1. It provides immediate pain relief and accelerated wound healing.

For:

Adults and children from the age of 6.

Contents:

15 ml.

Lactona Europe B.V.

Bergen op Zoom

The only toothbrush manufacturer in Holland

'Lactona' as a Brand name was first used in toothpaste in 1931 and was developed by a dentist in the USA. In 1954 the name Lactona was used for the multi-tufted M39 toothbrushes with a rubber tip, which were being produced in the USA. In 1982, the production facilities moved from the USA to Bergen op Zoom in the Netherlands, where the Lactona factory is still established.

In the beginning only toothbrushes were produced in Bergen op Zoom, but as the request for interdental products was growing fast, production of interdental cleaners started in 1992. In 1996 Lactona got a Dutch owner. From that moment Lactona was divided into two sister-companies Lactona Europe B.V. and Lactona USA, each with their own markets.

Nowadays Lactona offers a complete assortment of top quality oral hygiene products. Lactona products are distributed in the Dutch market as well as exported to other countries, in close cooperation with different export dealers.

All Lactona products are developed in close cooperation with dental universities and schools for hygienists. All Lactona products meet the ISO 9001:2008 standards.
